

## **Fact Sheet**

### **Bryghusprojektet's three collaboration partners**

#### **Realdania**

Realdania's mission is to create quality of life through the built environment. We focus on the life that is lived in and between buildings. We want to create qualities and values for the benefit of people throughout Denmark.

Realdania was established in autumn 2000. Since then we have launched different projects aimed at increasing the quality of life in the city; in construction as well as in construction culture throughout Denmark. We focus on subjects such as developing new construction, practicable innovation, good methods of restoration, architectural quality and craftsmanship, better process management, visionary urban development, research, dissemination etc.

For more information about Realdania visit [www.realdania.dk](http://www.realdania.dk)

#### **Realea**

Realea A/S is property company for development and preservation. The objective of Realea is to build a portfolio of good examples of architecture and building style from the various periods of time, geographically distributed throughout Denmark.

Realea has two focus areas; the first area is new construction focusing on the development of experimental new construction. The second area is about securing specific, preserved or preservation-worthy buildings for the future, provided that there is a present-day purpose of use.

Realea is the owner of Bryghusprojektet.

#### **DAC | Danish Architecture Center**

DAC | Danish Architecture Center is a visionarium developing and disseminating knowledge about architecture, construction and urban development which focuses on the future. There is a wide range of activities, e.g. exhibitions, conferences, seminars, presentations and teaching services aimed at professionals as well as the mainstream cultural audience.

DAC's activities unite the knowledge and competences of the corporate world as well as culture in order to contribute to development and innovation within architecture, construction and urban development. The aim is to create a collaboration across construction work and architecture so that sector actors can together contribute to forward development of architecture and construction, as well as the Danish community in general. DAC's activities are carried out at regional, national and global levels.

DAC is financed through a partnership between the Danish Ministry of Culture, the Ministry of Economic and Business Affairs and Realdania.

With its new facilities in the building, DAC will be responsible for much of the public life to be created in the area.
